Vigilant Lest More than a Minute There and Had This Handicap Also to Overcome.

HUNTER'S QUAY (Firth of Clyde), fuly 7.-In the race for the Queen's Cur at the regatta of the Royal Clyde Yacht Club, to-day, Britannia went over the line almost immediately after the gun was fired at 10.30 A. M., and at Cloch Point she had a slight lead, which she

was increasing, over Vigilant.
All the points where times are taken, such as Hunter's Quay, Skelmorlie, Asog, Toward Point, Innellan, Cloch Point and Kilcreggan, were black with people ween Vigilant and Britannia.

The British yacht on Thursday doubtedly made a good showing, better than most persons here expected, but the splendid sailing of the American boat her bad luck in losing the wind off Ashton and the brilliant struggle she after-wards made to reach the finishing line ahead of her rival, won her hosts of

craft, foreign or home made, and it is safe to say that Vigilant will be almost was Britannia when she defeated her Yacht Club's regatta Thursday.

vachtsmen feel for a fine craft, the Americans have won very many friends by their quiet, seamanlike behavior, and, finally. Valkyrie's crew have spoken so reated in New York that everybody tereabouts feels most kindly towards the

pronzed sailors of Vigilant. Same Course as of Thursday.

The course to-day is that of the Royal Clyde Yacht Club, the one sailed over at the Mudhock Tacht Club contest on Thursday, namely, from mark-boat No off the club-house here, to and around mark-boat off Skelmorlie, on the opposite shore; from there to and around mark-boat off Ascor, Isle of Bute, on this shore; thence across the Clyde to and around the mark-boat off Kilcreggan distance fifty miles.

In to-day's race, according to the official rating, Vigilant having been meas ured yesterday, the American yacht at 175 tons to Britannia's 152 tons allows the Prince of Wales's cutter three min

dr. Dunn Fears that a Thunder Storm Is Scheduled.

Beneath the broad, expansive smile with which Phoebus, the sun god, floods the earth to-day, there lurks an anarchis tic enemy, which Mr. Dunn, Scrutinize of Celestial Bodies, fears will break oose to-night and tear things wide open in the heavens.
Old Boreas, Mr. Dunn thinks, has an

air-tight cinch on every meteorologica condition which goes to make up an Al 'dunder-und-blitzen' storm.

There is an uncommonly high rate of numidity, 81, this noon, which betokens humidity, & this noon, which betokens an almost full tap of moisture, and all it requires for a first-class fusiliade of aerial artillery is a little higher pressure of temperature than is now prevailing.

At & o'clock to-day New Yorkers knew that it was bound to be a fine day. Thermometers registered but & degrees, which old Assculaplus himself is on record as saying is just the correct thing to have in the line of temperature. The illusive little bubble of mercury, however, cappered up 4 degrees by high noon, and its climbing hadn't stopped, either.

It was due to gurgle to and fro a few degrees higher, but not more than 75 degrees at the outside, with the exhiliarating westerly zephyrs caressing the brows of the people.

"However," added Mr. Dunn, "there
